DEUTSCHE BÖRSE  
MARKET DATA

## Historical Data on Demand

With Deutsche Börse – Historical Data on Demand you gain direct access to our high-performance database with more than 200 terabytes of historical trading data from the trading platforms Xetra® and Eurex®, as well as index data. You can download the data for your analyses whenever you need them: individually, reliably and fast.

### Data offer

- Order book data (up to level 20) (coming soon)
- Best bid/Best ask
- Tick data
- Price time series (OHLC)
- Closing prices
- VWAP

### Query options

#### WebShop front end

Order your individual instrument range direct via our WebShop Historical Data. After closing your order you can download the data directly.

#### API

There is a HTTP-based interface (REST) available for your regular retrievals of individual datasets for your analyses. Enquiries can be automated and data can be load directly whenever you need them. For example into your analysis tools, business intelligence solutions and spreadsheets.

### Contract models

#### Ad hoc ordering

You can order and download the data you want ad hoc at any time via the historical data web shop. Your data are available for download for five days.

#### Subscription

With a subscription, you receive access to your chosen data for one year, and, also available, a history over 12 or 24 months is included. Data are updated daily from the start of your contract so that you have daily access to data from the previous trading day.

#### The benefits you receive

- 365 x 24 availability
- The data are available as a flexible service
- Time to market

You can obtain further information directly via the historical data web shop at [datashop.deutsche-boerse.com](http://datashop.deutsche-boerse.com) or from
