

# Deutsche Börse Group's T7 - Cash Markets

## What's New!

### Release 9.0

Version 9.0\_01

Date 21. Aug 2020

# 1 Latest Changes

## 1.1 Trade At Close (TaC)

TaC is a potential 'trade at close' phase of an instrument following the closing auction during which trader can enter orders at the fixed closing auction price, if available.

Most important T7 GUI enhancements:

- *User Maintenance*: A new TaC parameter defines default behaviour for order entry
- *Order Entry*: New TaC checkbox allow traders to overrule default setting individually:
  - : Order does participate in Trade-At-Close phase
  - : Order does not participate in Trade-At-Close phase
  - : User specific default value as defined in *User Maintenance* is used.
- 'Trading At Close' will not be available for trading model CA-S

## 1.2 Maintenance Of Shared Profiles/ Text fields Enhanced

Shared profiles and text field configurations can be maintained by other traders than the originator as follows:

- all Head Traders can maintain "Group Shared" entries of its group
- all Supervisors can maintain "BU Shared" entries

## 1.3 Xetra BEST removal

Order Entry and other respective GUI views have been updated to reflect Xetra BEST functionality has been discontinued from T7.
