

# Introducing T7

## A new generation trading architecture from Eurex Exchange

---

**More choices,  
greater performance,  
Eurex reliability.**

Building on our track record as the first-mover in electronic trading, Eurex Exchange's T7 trading architecture, developed by Deutsche Börse Group, is set to revolutionize the way traders and investors access market opportunities worldwide.

Designed in partnership with exchange participants, the architecture aims to enhance performance across the board, including reduced latency and increased throughput. It's a new generation of technology to deliver a world of opportunity.

# T7 features many innovations.

- Greater system flexibility, allowing for reduced time-to-market when introducing new financial products and new functionality.
- High-performance messaging architecture for minimum latency, fast communications and the utmost reliable database systems.
- Improved functionality, including enhanced calendar spreads and user-defined strategies.
- Streamlined processing and reporting.
- Running on Deutsche Börse's advanced network infrastructure – tailored services with global reach.

With T7, Eurex Exchange provides an even more dynamic and responsive environment for trading over 1,900 products from around the globe – including futures and options on benchmark indexes, leading fixed income derivatives and access to one of the world's most attractive markets.

Our goal has been to transform the way a user can trade on the exchange, while continuing to deliver renowned Eurex Group reliability and even more opportunities to make the most of the market.

T7 is part of the 7 Market Technology series from Deutsche Börse Group. Alongside the new trading architecture, the series includes our high-speed global connectivity network and will soon feature an advanced clearing architecture.
