MSCI is the index provider of choice for investors seeking broad and reliable benchmarks across a range of markets. Eurex Exchange offers the most comprehensive suite of listed MSCI Index Futures and Options, available on screen, via the order book, as well as block trading via Eurex Trade Entry Services.

MSCI Indexes are amongst the most widely tracked benchmarks with over USD 11 trillion assets under management (AUM) linked to them globally. Additionally, MSCI Indexes serve as the basis for over 500 exchange traded funds (ETFs). The unprecedented amount of capital benchmarked against MSCI Indexes and the creation of index based products via ETFs has led to the necessity for futures and options as they help asset managers facilitate in and outflows of funds, hedge existing equity exposure and enhance portfolio performance.
